

CHAPARRAL POINTE ADULT VILLAGE NEWSLETTER

August 16, 2018

Grading/Landscape Updates: Work is being done around our complex this week by Assiniboine Landscapers. This is to enable better water flow in the area to prevent any possible flooding in the future.

Drip Edge Flashing: Starting Friday, August 17th, the company Rush Roofing will be on-site to install drip edge flashing adjoining the eaves troughs over the front door and step of each unit. This will prevent some of the ice damming such as many experienced this past winter. Hopefully you can look forward to no (or fewer) icicles over your steps, and less ice to deal with.

Details for **further improvements and repairs** are being hammered out with various companies. Stay tuned!!
